

Enhanced 3832 *Easy-Close*

- Exceptionally smooth and fluid movement
- Reliable soft-close action
- Front face frame hole

Accuride[®]
Always Moving Forward

Enhanced 3832 Easy-Close

The enhanced 3832 Easy-Close provides flawless movement and superior soft-close action. A front face frame hole speeds installation and more space within the slide makes it more forgiving of variations in materials and cabinet construction.

Applications include residential cabinetry as well as commercial or institutional casework found in libraries, schoolrooms, laboratories or hospitals, and high-end retail stores.

Features & Benefits

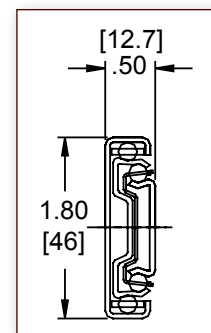

- 100-pound load capacity
- Full extension for complete access
- Reduced friction between components and new grease formulation provide ultra-smooth movement.
- The Easy-Close mechanism has a smooth, gradual soft close. Designed to resist the affects of compression, new stronger springs help ensure complete closure and reliable performance.
- Longer ball retainers with 15% to 30% more ball bearings provide greater strength and smoother operation.
- Front face frame hole eliminates need for front mounting bracket, saving time and money.
- Rear mounting holes and breathing tabs provide greater stability and help absorb variances in side mount applications.
- Lever disconnect for easy removal and reinsertion
- Cam Drawer Adjust feature allows for vertical drawer front adjustment.

Availability

- Even lengths 14"–28"
- Finishes: zinc or black.

Optional Kit

- Rear Face Frame Bracket Kit
P/N 4180-0745-XE
